

ChatGPT examples for Lesson Planning:

1. ChatGPT can research and gather relevant content and links for your lessons without the need for you to do endless web research

ChatGPT prompt to use: "Provide me with reliable sources and information on the topic of [topic] for my upcoming [subject] lesson."

2. ChatGPT can structure a detailed lesson plan

ChatGPT prompt to use: "Can you provide me with a lesson plan template or a suggested outline for teaching the topic of [topic] to [grade level] students?"

3. ChatGPT can offer ideas for technology tools and platforms

ChatGPT prompt to use: "Can you recommend any educational apps or tools that are suitable with teaching [grade level and subject] on [topic]?"

4. Generate discussion and lesson prompts with ChatGPT

ChatGPT prompt to use: "I need some thought-provoking discussion prompts for my lesson on [topic]."

5. Create instant worksheets and exercises with ChatGPT

ChatGPT prompt to use: "Create a worksheet on [topic] with a list of [number] exercises related to the [learning objectives]."

ChatGPT examples for Research, Brainstorming, and Information Gathering:

6. Ideas generation with ChatGPT (on almost any topic!)

ChatGPT prompt to use: "I am working on [project/problem]. Can you help me generate some innovative ideas and potential approaches to address this project/problem?"

7. You can also get ChatGPT to generate classroom decoration ideas:

ChatGPT prompt to use: "Can you give me some classroom decoration ideas for [theme]?"

8. ChatGPT can offer guidance on effective research methodologies and data collection techniques

ChatGPT prompt to use: "I am teaching my students to research on [topic]. Can you suggest some key approaches, research methods and data collection techniques for my students?"

9. ChatGPT can generate hypothetical scenarios to fuel the brainstorming process.

ChatGPT prompt to use: "I am teaching the [topic] in [subject]. Can you generate a hypothetical scenario for [topic/issue] and provide details and potential implications for the topic?"

10. Concept exploration with ChatGPT

ChatGPT prompt to use: "I'm introducing the [concept] in my [subject] class. Can you provide additional insights, examples, and real-world applications to help students explore and grasp the concept more thoroughly?"

11. Mind-mapping with ChatGPT to reinforce learning.

ChatGPT prompt to use: "I want to generate a mind map for the [topic]. Could you create a visual representation that captures the key concepts, subtopics and their relationships?"

ChatGPT examples for Classroom Instruction and Support:

11. ChatGPT can answer almost any of your student's questions.

ChatGPT prompt to use: "Can you provide a simple explanation of [topic/concept] for my students of [grade level]?"

12. ChatGPT is good at explaining complex topics or phenomena, like so:

ChatGPT prompt to use: "Can you explain [concept] in simple terms?"

13. Use ChatGPT as your personal language translator

ChatGPT prompt to use: "Translate the following sentence from English to [target language]: [sentence]."

14. ChatGPT can provide comprehensive recommended reading lists, like so:

ChatGPT prompt to use: "Suggest some books and articles related [topic] that I can recommend to my [grade level] students for further reading."

15. Think ChatGPT is just a robotic chatbot? Think again. ChatGPT can assist a replacement teacher to teach in the style of an absent teacher.

ChatGPT prompt to use: "I need guidance on how to continue the lesson on [topic] left by another absent teacher. He/She teaches in [briefly describes the teaching style of the teacher]. Can you provide suggestions on how to teach in his/her style?"

16. Alternatively, get creative and use ChatGPT to teach in the style of a famous person or idol:

ChatGPT prompt to use: "Teach the concept of [subject/topic] in the style of [famous person/idol]."

ChatGPT examples for Personalized Learning and Differentiation:

17. ChatGPT can adapt content to individual student needs and diverse learning styles by providing tailored resources and recommendations.

ChatGPT prompt to use: "I have a student with [learning style/need]. Can you recommend specific resources or tools that cater to this learning style?"

18. ChatGPT can facilitate self-paced learning. Here're some recommendations from ChatGPT itself:

ChatGPT prompt to use: " Can you provide me with recommendations on how to structure and implement self-paced learning experiences for my students?"

19. ChatGPT can customize learning paths based on student progress

ChatGPT prompt to use: "I have a student who is not doing so well in [topic/subject]. [Briefly explain the student's classroom performance.] Can you help me identify areas where each student may need further practice or exploration?"

20. ChatGPT can assist students with special needs. For instance, it can develop individualized education plans (IEPs), provide visual aids or auditory assistance for students with disabilities, and facilitate communication development for non-verbal students, as shown below:

ChatGPT prompt to use: "Can you help create an individualized education plan (IEP) for a student with autism?"

ChatGPT examples for Student Engagement and Collaboration:

21. ChatGPT can generate instant quizzes and trivia:

ChatGPT prompt to use: "Suggest some quiz questions on [topic] for [grade level] students."

Bonus: Plug these ideas into [ClassPoint](#) to instantly transform your classroom experience! See how you can do so [here](#). Copy and paste these questions to your PowerPoint and add quiz buttons to turn them into interactive quizzes! Or you can use [ClassPoint AI](#), an AI quiz generator integrated inside PowerPoint to generate quiz questions from your slide content without the need to exit PowerPoint!

22. Get your students to engage with ChatGPT as a game partner in a classroom game or competition.

ChatGPT prompt to use: "Hey ChatGPT, let's team up for a classroom game! I'll give you a clue or question, and you can provide the answers or hints. Are you ready?"

23. ChatGPT as a virtual debate opponent or partner. Simply get your students to present arguments or counterarguments to the AI.

ChatGPT prompt to use: "Engage in a debate with me on the [topic]. Present your side of argument and let's have a constructive discussion!"

24. Engage in interactive storytelling easily with ChatGPT. The story can even adapt based on students' choices.

ChatGPT prompt to use: "Let's create a story together! Start with an opening line, and I'll respond with the consequences. We can continue the story by taking turns."

25. ChatGPT can facilitate role-playing scenarios. It can even assume the role of a historical figure or fictional character from literature.

ChatGPT prompt to use: "Imagine you're Sherlock Holmes solving a mystery. Ask me questions, and I'll provide clues and information to help you crack the case!"

26. Field trip guide knowledgeable in history, science, and many more!

ChatGPT prompt to use: "We're exploring the [place]! Describe what you see, and provide information and interesting facts about the place."

Use ChatGPT for simulation-based learning

27. Build interactive classroom games from scratch in no time with ChatGPT!

ChatGPT prompt to use: "Design me an educational game on [topic]. Describe the rules, objectives, learning outcomes, and gameplay mechanics."

28. Cultural exchange handy helper. Teachers can connect with classrooms in different parts of the world and use ChatGPT as a mediator for cross-cultural exchanges.

ChatGPT prompts to use: "What are some traditional customs or celebrations in [country]?"

"What are some common greetings or gestures in [country]?"

29. Not able to invite guest speakers? No problem. Simply use ChatGPT to simulate conversations with virtual guest speakers to allow your students to gain insights on specific topics of interest.

ChatGPT prompt to use: "You are now a guest speaker and expert on [topic]. Can you share your insights on [topic]? What are some current trends or developments in [industry]?"

30. Reflection and journaling no longer need to be a solitary experience. Teachers can use ChatGPT to run journaling activities with the students to aid their personal growth, like so:

ChatGPT prompt to use: "You are now a journaling assistant. Provide a list of prompts for self-reflection for Grade 9 students."

31. Augmented Reality (AR) and Virtual Reality (VR) Experiences: ChatGPT can work in conjunction with AR or VR technologies to create immersive and gamified learning experiences.

ChatGPT prompt to use: " Simulate a physics lab in VR, allowing students to manipulate virtual objects, conduct experiments, and receive guidance on data collection, analysis, and interpretation.

32. ChatGPT can remix your student work, like so:

ChatGPT prompt to use: " Remix [student work] into a [media form]."

ChatGPT examples for Gamification:

32. Create a class points system with ChatGPT

ChatGPT prompt to use: "Imagine your classroom has a points system. How would students earn points? What actions or behaviors should be rewarded?"

33. Create quests and missions with ChatGPT

ChatGPT prompt to use: "Create a series of quests or missions for my students to complete throughout the school year. What challenges or tasks would they need to accomplish?"

34. Create avatars and character customization with ChatGPT

ChatGPT prompt to use: " Let students create their own avatars for the gamified classroom. What options would they have for customization, such as appearance, accessories, or special abilities? If students' avatars could level up or gain new skills, what would those skills be?"

35. Define achievements and badges with ChatGPT

ChatGPT prompt to use: "Brainstorm a list of achievements or badges that students can earn in different subject areas or for demonstrating specific skills. What criteria would be required to unlock each achievement?"

36. Create cooperative challenges with ChatGPT

ChatGPT prompt to use: "Create cooperative challenges that require students to work together as a team. What collaborative tasks or projects would they need to complete?"

37. Build leaderboards with ChatGPT

ChatGPT prompt to use: "Design a leaderboard that tracks students' performance in different academic areas or skills. How often would the leaderboard be updated, and how would it motivate students?"

38. Craft power-ups and rewards with ChatGPT

ChatGPT prompt to use: "If students had access to power-ups or special abilities, what would they be? How could students earn or activate them to enhance their learning experience?"

39. Progress tracking and feedback with ChatGPT

ChatGPT prompt to use: "How would you track and visualize students' progress in the gamified classroom? What tools or systems would you use to provide feedback and monitor their growth?"

40. Create gamified assessments with ChatGPT

ChatGPT prompt to use: "Design a quiz game that rewards students with virtual badges or achievements for answering questions correctly in different subject areas."

41. Gamified Study Tools: ChatGPT can generate interactive study tools such as flashcards, mnemonic devices, or interactive quizzes that make learning more engaging and enjoyable.

ChatGPT prompt to use: " Design a study tool that rewards students with virtual currency or tokens for completing study tasks or reaching study goals"

ChatGPT examples for Reviews and Assessments:

42. ChatGPT can provide (very detailed) feedback if you feed it with the right prompt.

ChatGPT prompt to use: " Can you provide a report on the paragraph which is enclosed by a double quote? The report should include document statistics, vocabulary statistics, readability score, tone type (available options are Formal, Informal, Optimistic, Worried, Friendly, Curious, Assertive, Encouraging, Surprised, or Cooperative), intent type (available options are Inform,

Describe, Convince, or Tell A Story), audience type (available options are General, Knowledgeable, or Expert), style type (available options are Formal or Informal), emotion type (available options are Mild or Strong), and domain type (available options are General, Academic, Business, Technical, Creative, or Casual). Can you explain what grammar mistakes you have corrected, including an explanation of the rule in question? Can you check the following paragraph, which is enclosed by a double quote for grammar mistakes, and provide a revised paragraph [student work]"

43. Create grading rubrics with ChatGPT

ChatGPT prompt to use: "Create a grading rubric with detailed outline of the criteria and performance levels for [grade level] [subject] class."

44. Design assessment questions for students of all levels

ChatGPT prompt to use: "Could you generate a set of [question type] questions that cover [subtopics, ideas, and concepts] related to this topic? Make it [difficulty level]."

45. And assist teachers with what they do best: detecting plagiarism.

ChatGPT prompt to use: "I've noticed some similarities in the writing styles of a few student assignments. Can you help me identify the source or potential plagiarism by providing any matches with external sources for the following two assignments in block quote?"

ChatGPT examples for Administrative, Guidance, and Support:

46. ChatGPT can help you manage classroom logistics and announcements by assisting with scheduling and reminders, drafting announcements and even setting up appointments, for important tasks and events.

Example ChatGPT prompt: " Can you help me draft a message to inform my kindergarten students' parents about the upcoming field trip to San Diego Zoo. including details such as date (July 20th, 2023), time (8am-5pm), and include a section for parents' signatures.

47. Use ChatGPT to facilitate communication with your students

ChatGPT prompt to use: "I noticed some of my students have difficulty approaching me with questions or concerns. Can you suggest effective strategies to improve communication between me and my students?"

48. Data visualization for student performance. You will be surprised that ChatGPT can generate insightful charts, graphs, and visual representations of data for various scenarios.

Prompt to ask ChatGPT: "I have collected data on my students' performance in the latest assessment. Can you help me create visualizations, such as graphs or charts?"

49. ChatGPT can offer guidance on effective time management and productivity strategies

ChatGPT prompt to use: "Can you suggest effective strategies, tools, or techniques my students can use to improve their productivity and manage their time more efficiently?"

50. ChatGPT as a college application advisor

ChatGPT prompt to use: "A student of mine is applying for the [program] at [university]. Can you provide guidance on the application process, essay prompts, and tips for crafting compelling personal statements?"

51. Career Exploration: ChatGPT can be the walking Wikipedia to assist your students in exploring various career paths, professions, and educational requirements.

ChatGPT prompt to use: "My student is interested in the studies of [subjects/topics] and is skilled in [strengths]. Can you provide insights on different professions and educational pathways that would likely match the student's profile and interest?"

52. Interview preparation with ChatGPT. ChatGPT can also help your students prepare for interviews:

ChatGPT prompt to use: "My student is preparing for a college interview and I would like you to practice a college interview with her. Ask her about her motivations to pursue a degree in [degree], and follow-up questions following her response."

53. ChatGPT as mindfulness and well-being companion

ChatGPT prompt to use: "I'm looking for ways to promote mindfulness and well-being among my students. Can you provide relaxation techniques, mindfulness exercises, or positive affirmations that I can share with them to foster a positive classroom environment?"

54. Use ChatGPT to write recommendation letters

ChatGPT prompt to use: " Write me a college admission recommendation letter for my [student] applying for [area of study/university location]. Include the following information about the student: [student details]."

55. Making future predictions of student performance. Yes, you heard it right! ChatGPT can be used to make forecasts by analyzing historical trends, patterns, and correlations.

ChatGPT prompt to use: " I would need your help to make predictions on this student's grade in the fourth semester of the year. This is his grade performance for the past 3 semesters [include grade history]"

56. ChatGPT as a problem-solver

ChatGPT prompt to use: "Here is the problem/issue: [problem]. Can you help brainstorm different approaches, methodologies, or frameworks I can use to analyze and solve the problem effectively?"

57. ChatGPT can help you organisation information

ChatGPT prompt to use: "Help me organize [information] into [desired format]."

58. ChatGPT can give you feedback on your teaching methods or strategies

ChatGPT prompt to use: "What do you think of [teaching method]?"

ChatGPT examples for Presentation and Public Speaking:

59. Slides Generation: ChatGPT can assist in generating content for presentations.

ChatGPT prompt to use: "I'm working on a presentation about [topic]. Can you help me generate a presentation slide deck of [number of slides] which covers [subtopics] and includes relevant supporting information, statistics, and examples?"

60. Ready-Made Slides in PowerPoint with ChatGPT

ChatGPT prompt to use: "Write me VBA PowerPoint codes on [topic]. Make it [number] slides."

61. ChatGPT as a speech writing assistant. ChatGPT can even suggest impactful openings, transitions, rhetorical devices, and memorable closing statements.

ChatGPT prompt to use: "I have to deliver a persuasive speech on the [topic]. Can you help me with structuring the speech, and provide suggestions for impactful openings, transitions, and a powerful closing statement that will resonate with the audience?"

62. Use ChatGPT for slide design inspiration

ChatGPT prompt to use: "I'm designing slides for [topic/purpose]. Can you provide me with ideas and inspiration for visual layouts, color schemes, and slide structures that will effectively convey my message and captivate the audience?"

63. Use ChatGPT for visual media recommendations. Even though ChatGPT is a chatbot without the capability to generate images, videos, and infographics, it can give you pretty solid guidance on how to create them yourself.

ChatGPT prompt to use: I am preparing a presentation slide deck on [topic]. Can you recommend relevant visual media, such as images, videos, infographics, or multimedia elements that will enhance the visual appeal and effectively convey the key concepts to the audience?"

64. Use ChatGPT for language enhancement

ChatGPT prompt to use: "I have drafted the content for my presentation. Can you review it and suggest improvements, alternative phrasings, grammar corrections, and overall enhancements?"

65. You can even get ChatGPT to train your presentation skills!

ChatGPT prompt to use: "I have a presentation on [topic]. Can you provide some tips and guidance on public speaking, which includes body language, vocal delivery, and techniques to engage the audience during my presentation?"

66. ChatGPT can generate audience interaction ideas

ChatGPT prompt to use: "I have a presentation on [topic]. Can you suggest interactive activities and ideas that will keep the audience engaged and make the presentation more memorable?"

67. ChatGPT can handle Q&A sessions. Yes, when ChatGPT can play the role of a guest speaker, there is no doubt it can handle Q&As.

ChatGPT prompt to use: "I will be delivering a presentation on [topic] to [target audience]. Can you provide me with some potential questions that audience will ask as well as tips and

strategies on how to handle those questions, and provide concise and informative answers that satisfy the audience's inquiries?"

ChatGPT examples for Homework Assisting:

68. ChatGPT as a homework assistant

ChatGPT prompt to use: "This is the homework assignment for my students: [assignment topic]. Can you provide some tips and relevant resources to get them started on the assignment?"

69. ChatGPT to support students in research

ChatGPT prompt to use: "My students will be writing on a paper on [topic]. Can you help find reliable sources and provide different perspectives on the [topic] to help them started on the paper?"

70. ChatGPT to help as a homework accountability partner

While ChatGPT does not have built-in notification capabilities, it can still help with task tracking and reminders. For instance, if your students have an upcoming deadline due on Friday, ChatGPT will remind your students of their deadlines on Friday in the upcoming conversations.

71. ChatGPT as a peer tutor. We have to be honest. ChatGPT does a rather amazing job as a peer tutor.

ChatGPT prompt to use: "You are now the peer tutor of my students. They will ask you any questions they have regarding the [topic] and you will provide answers to them."

ChatGPT examples for Revision and Exam Preparation:

72. Creation of study guides and summaries with ChatGPT

ChatGPT prompt to use: "My [grade level] students have an upcoming exam on [topic and subject]. Can you generate a study guide and summary of the topics we have covered in class, which include [topics taught]?"

73. ChatGPT for study groups facilitation

ChatGPT prompt to use: "I'm helping my students to form study groups. Can you provide effective strategies on grouping, facilitation as well as assistance in facilitating their discussions?"

74. ChatGPT for concept reinforcement

ChatGPT prompt to use: "I want to help my students reinforce their understanding of the concepts I have taught in class. Can you provide us with practice questions, quizzes, or exercises related to [topic], and give immediate feedback on the answers provided?"

75. ChatGPT for learning resources recommendations

ChatGPT prompt to use: "I'm helping my students revise on [topic]. Can you recommend some online articles or documentaries that provide a comprehensive overview of the topic and would be helpful for their revision?"

76. ChatGPT can generate practice tests and mock exams

ChatGPT prompt to use: "Can you provide some practice questions or mock exam questions and answers for [grade level] [subject]?"

77. ChatGPT can provide tips for effective test-taking

ChatGPT prompt to use: "My students have an upcoming exam on [subject]. Can you share some tips and strategies to improve their performance during exams?"

78. Test scenarios simulation with ChatGPT

ChatGPT prompt to use: "Can you help simulate test scenarios and ways to deal with these scenarios to reduce my students' exam anxiety and stress?"

ChatGPT examples for Different Subjects:

Art and Design

79. ChatGPT for artistic and design inspirations for art projects

ChatGPT prompt to use: "My students are now working on a visual arts project and need some inspiration. Can you suggest some art movements or design principles that align with the theme of the project, which is focused on [theme]?"

80. ChatGPT can assist in AI art generation

Simply give ChatGPT the artistic style/theme/mood/topic you are looking for, and let it do the magic. You can then feed these art prompts into Text to Art AI generators like [Midjourney](#) and [Stable Diffusion](#) to see them turn into reality.

ChatGPT prompt to use: "Can you generate a list of art prompts for [art style/theme/mood/topic] that can be used in [Text to Art AI generator]?"

81. ChatGPT as an art techniques expert

ChatGPT prompt to use: "Explain the [art technique] in detail."

Computer Science and IT

82. ChatGPT can create code and build an app for you, including an app to summarise essays. Check this out.

ChatGPT prompt to use: "Write the code to build an app on [purpose and function of the app]."

83. ChatGPT can assist with programming code debugging and troubleshooting.

Prompt to ask ChatGPT: "Here is a programming problem [programming problem]. Assist with debugging and troubleshooting the problem related to [programming language or concept]."

Environmental Studies

84. ChatGPT as an environmental impact simulator to teach students ways to mitigate environmental damage.

Prompt to ask ChatGPT: "Imagine a scenario where a city is planning to construct a new highway that will cut through a forested area. Can you simulate and describe the potential consequences of constructing the highway on the ecosystem, wildlife habitats, air and water quality, and overall biodiversity? Additionally, provide suggestions for mitigating the environmental damage and promoting sustainable practices in the construction and operation of the highway."

Geography

85. Use ChatGPT to train students on global landmarks identification.

ChatGPT prompt to use: "Generate geography quiz questions and challenge the students to identify global landmarks."

86. ChatGPT can analyze landforms of a location, like so:

ChatGPT prompt to use: "Analyse the landforms of [location] and explain their formation processes."

History

87. ChatGPT as a history expert

ChatGPT prompt to use: "Provide historical facts and context related to [period/event]."

88. Historical reenactments and resurrecting dead historical figures (non-literally). You can simulate conversations with historical figures who are no longer around.

ChatGPT prompt to use: "Let's simulate a conversation with [historical figure]. Respond as if you were that person, based on their historical perspective."

Language and Creative Writing

89. Generate essay prompts with ChatGPT

ChatGPT prompt to use: "Could you generate a list of [number] essay prompts for the [topic]?"

90. Use ChatGPT to practice language learning, for instance, French:

ChatGPT prompt to use: "I would like you to practice French conversation with my students. Ask them questions about food and provide feedback on their responses."

91. ChatGPT as a creative writer's guide. You can use ChatGPT to help your students with character development or backstory creation for their writing assignments.

ChatGPT prompt to use: "I'm working on a new character for a game of mine, and I need him to have the most ridiculous backstory ever. Like, literally so ridiculous that it arguably doesn't make sense. I need it to include the following themes: royalty, abandonment, hell dimensions, seagulls, loss of limb, and enlightenment. Can you think of a ridiculous backstory for him?"

92. Use ChatGPT to assist with media literacy and critical analysis of news articles.

ChatGPT prompt to use: "Can you assist in analyzing this news article in double quote for bias and helping students understand media literacy concepts involved?"

93. ChatGPT as a grammar teacher

ChatGPT prompt to use: "Teach the grammar rule of [specific rule] and provide examples to illustrate its usage."

94. ChatGPT as a thesaurus

ChatGPT prompt to use: "Introduce a list of new vocabularies related to [mood/concept/word] and provide example sentences for each word."

Math

95. ChatGPT can provide step-by-step mathematical solutions

ChatGPT prompt to use: "Demonstrate step-by-step solutions for the equation [equation] to help students understand the solution process."

96. Use ChatGPT for data analysis

ChatGPT prompt to use: "Analyze the given set of data: [data] and help identify patterns, trends, and draw conclusions."

Music

97. ChatGPT as music composer.

ChatGPT prompt to use: "Write a piano piece in the style of Mozart."

Philosophy and Ethics

98. Use ChatGPT to engage in philosophical discussions with students

Science

99. Generate non-textbook science experiment ideas with ChatGPT

ChatGPT prompt to use: “Generate ideas for science experiments for [subject] related to [topic] that can be conducted in a classroom setting.”

100. Use ChatGPT to simulate virtual labs

ChatGPT prompt to use: “Simulate a virtual lab environment where students can perform experiments and analyze data for [specific science topic].”

On Things Schools Don’t (Directly) Teach You

1. **Financial Literacy:** ChatGPT can provide practical lessons on personal finance, budgeting, and even investment strategies and advice. Check this out:
2. **Emotional Intelligence:** ChatGPT can simulate conversations that involve self-reflection and emotional regulation exercises and techniques.
3. **Entrepreneurship and Business Skills:** ChatGPT can offer guidance and insights on entrepreneurship, business and market strategies, and practical skills needed to start a business.
4. **Critical Thinking and Problem-Solving:** ChatGPT can serve as a virtual tutor, providing problem-solving scenarios to stimulate critical thinking.

Bonus: Upskilling and Professional Development

By combining ChatGPT’s comprehensive abilities we have seen so far, from lesson plan creation and resource recommendations to assessments and review, one can effectively self-teach a subject matter using just ChatGPT. With that said, teachers can easily leverage ChatGPT’s vast knowledge and expertise to continuously upskill and engage in professional development. Try it out for yourself:
